

Biography Photographs — Audit and Corrections

James Kenechukwu Onwubalili Foundation · prepared in response to your note on the left-hand column

Every one of the six points you raised has been actioned. In each case the photograph on the page was a **duplicate of another image already in the gallery**, carrying a caption that did not belong to it. Those entries have been removed, so each photograph now appears once, under its correct caption.

We then checked all **52 photographs** in the archive against your five descriptions. None of the five is among them — they appear never to have been sent to us. Where a related image exists, it is shown below with its reference number.

What we need from you

The five photographs above, whenever convenient. A numbered reference sheet of all 52 photographs we currently hold is attached separately — if any of the five is in fact already there and we have misread it, please just quote the number.

Two small queries on the text

- The family notes give your maiden name as both **Eruchalu** and **Onyemelukwe**. Which should the biography use?
- Your note refers to the wedding as **1980**; the biography text currently says **1981**. Which is correct?
- The text names the sons as “James and David” in one place and “Emeka and David” in another. Please confirm how they should be named.
